- 6 Qualifications

Graphite Security was founded by Nasr Haque.

Who had worked within the built environment and designed out crime field for a number of years.

Nasr has worked within the public and private sectors as a Security/Design Consultant. While being well versed in the crime prevention world, Nasr also understands design and human behavior by holding a degree in Landscape Architecture.

Graphite Security Ltd was founded on the basis of providing crime prevention advice with the highest level of expertise and clarity.

With the aim of helping clients with all their needs in a timely and professional manner.

“We exist to help reduce crime and create safer living spaces for people, With the overriding aim of reducing stress on the police.”

Our Services:

We offer several services to help you achieve excellent design with great security.

Crime Impact Statement (CIS)

The Crime Impact Statement (CIS) is the report requested by local planning authorities to be submitted with major planning applications. The CIS is not just a report but a consultation and evaluation process undertaken by Graphite Security Ltd and Greater Manchester Police.

We have a great rapport with GMP and are happy to provide the service of being the bridge between you and GMP to make things smoother and to iron out any tricky recommendations.

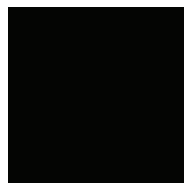

BREEAM Security Needs Assessment

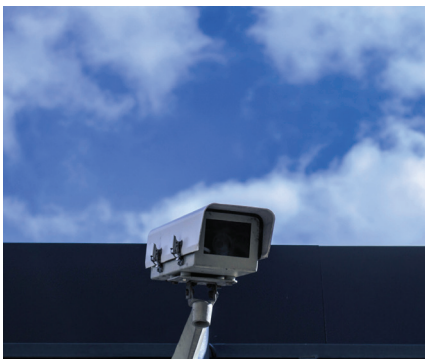

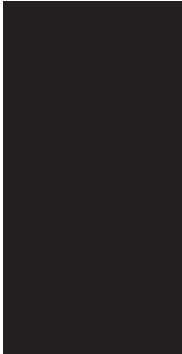

Security Needs Assessments (SNA) are conducted by in-house, Suitably Qualified Security Specialists (SQSS).

The assessment will consist of producing an evidence-based evaluation of the proposed site and neighboring surroundings and developing a set of holistic security controls and recommendations for incorporation into the scheme based on any identified threats and risks.

Full Security Assessment

Full Security Assessments involve mapping the building plans and identifying security threats and vulnerabilities. The aim is to help determine and prioritise risks. Analyse and develop security controls, document results, create a remediation plan, implement recommendations, and evaluate effectiveness.

Security Enhancements to private residencies and commercial spaces

As specialists in protection for individuals, we understand your lifestyle and your world.

Trust us to provide the bespoke security solution you need to protect you and your loved ones, your home, possessions, staff members and equipment.

Secured by Design Consultation

Having a fully licensed Secured by Design consultant on board has its benefits. Yet we cannot issue SBD certification. We can help smoothen the process and push you toward achieving SBD accreditation while putting the local force at ease that an SBD consultant is on board.

Our Qualifications:

Design Out Crime Certificate

Suitably Qualified Security Specialist (SQSS)

Fully Licensed Secured By Design Consultant
